

Just Play Lite NDI ²⁰²⁶

Streamlined Automated NDI Payout for macOS

Just Play Lite NDI is an automated single channel 24/7 Master Control Payout solution supporting SD, HD, and UHD formats. It seamlessly integrates video payout with live feeds, routers, triggered events and the delivery of static or real-time graphics.

Secure and Redundant 24/7 Payout

Manage your 24/7 Master Control payout in realtime with an unlimited number of clients working on the same channel, and industry-standard redundancy and failover support.

Industry Compliance

Major broadcast file format and codec support, back-to-back payout of mixed container formats, codecs, aspect ratios, pixel sizes and field orders.

Smart User Interface

The smart graphical user interface provides an unlimited, and frame-accurate review and preview of all selected video items including live inputs or custom elements such as timers or clocks.

Schedule Your Way

Schedule content weeks in advance with a user-friendly timeline, the traditional list view (with metadata support) and a convenient calendar function.

Switch To Live

Easily manage incoming live input signals such as live studio signals or satellite feeds, and send them to the NDI streaming output.

Mixed Frame Rate Support

Videos encoded with a "standard" broadcast timebase play out smoothly with frames automatically matching the channel's timebase.

NDI® High Bandwidth Support

Native NDI High Bandwidth payout of one video and one single layer of static or realtime graphics using Apple silicon hardware and the low-latency NDI technology.

Mind The Gap

Gaps, Overlays and Placeholders are easily visible and can be edited right away as Just Play Lite NDI's playlist-based design makes it easy to structure the rundown.

Static and Realtime Graphics

From simple lower-thirds to interactive realtime graphics. Use third-party data for news tickers, stock exchange information, or weather forecasts, with compatibility for singular.live, Viz Flowics, and SPX HTML templates.

SDR, HDR Color Spaces Support

Comprehensive compatibility for both SDR and HDR content, ensuring a seamless and secure broadcast payout experience.

Supported Codecs

- DV-PAL, DV/DVCPRO-NTSC
- DVCPRO, DVCPRO50, DVCPROHD, HDV
- All Apple ProRes Codecs
- HEVC (H.265)
- XDCAM EX/HD/HD422
- MPEG-2, MPEG-4, H.264
- MPEG IMX (30, 40, 50)
- AVC-Intra, XAVC-Intra
- Avid DNxHD®/Avid DNxHR® (decoder)
- JPEG
- Apple Animation Codec
- AV1

Supported Containers

- MOV, MP4, M4V
- MPG, MPEG
- MXF

System Requirements

- Apple Mac mini, iMac, Mac Studio, Mac Pro 2023 (EOS), Mac Book Pro, Mac Book Air - Apple silicon (M1-M5).
- Apple macOS Sonoma, macOS Sequoia, macOS Tahoe.
- Support for NDI High Bandwidth format.
- One-time online access for license activation.
- For detailed system requirements please consult the online user manual or contact the ToolsOnAir staff.

Supported Frame Rates

- 24, 25, 29.97, 30, 50, 59.94, 60
- Supported frame rates are container and codec specific. Codec support depending on installed Apple Pro Codecs.
